MLP STRATEGY

for Institutional Advised Clients

DIVIDEND ASSETS CAPITAL INSTITUTIONAL – INVESTMENT STRATEGIES FOR RISING INCOME & GROWTH 12/31/17

Focused Investment Approach

MLPs present the opportunity to participate in the energy sector while historically demonstrating less volatility than the underlying commodity. Within our midstream universe, we seek partnerships that have historically consistent rising distributions, strong balance sheets, and significant growth potential at attractive prices.

Disciplined Process

DAC starts with a bottom-up research approach focused on a number of factors: accelerating distribution growth, geographic footprint, credit quality focused on investment grade MLPs, and valuation analysis.

Our sell discipline is thoughtful and straightforward. An MLP will be sold if the fundamentals of the business deteriorate or if the MLP cuts their distribution.

Tax Advantaged Strategy

Taxation varies among the different investment vehicles. Direct ownership is the only way to get full tax benefits provide by the MLP.

Investing through ETNs, ETFs, or Mutual Funds expose the client to additional taxes, fees, and risk that could significantly alter their perceived experience.

Rising MLP Distributions

At DAC, we strategically focus on MLPs with strong distribution growth potential above the market over time.

Income in a Low Yield World

MLP yields compare favorably to other fixed income and equity instruments.

Rising Rate Environments

Inflationary growth environments tend to mean solid economics for energy producers, and we believe the underlying MLPs can provide inflation protection by utilizing fee based contracts tied to inflation indices.

ANNUAL DISTRIBUTION GROWTH

The annual distribution growth information above is for a representative account and are trailing twelve month rates based on the calendar year. In order to provide prior year comparisons, the minimum quarterly distribution, or the first full quarter distribution was used as a proxy for quarters where the company does not have a stated minimum quarterly distribution, there was no distribution or the distribution was for a partial quarter because the company had not yet had a public offering. The distribution growth of an individual account may differ due to client-specific constraints, tax considerations or other factors.

OWNERSHIP IN MASTER LIMITED PARTNERSHIPS. Master Limited Partnerships (MLPs) are limited partnerships that trade as units on public securities exchanges. MLPs are generally held in an investor's account to generate income. A substantial portion of the cash distributions made are considered a return of capital, tax-deferred until the units are sold. Investors should consult a tax advisor regarding individual circumstances. Investors in MLPs should determine the tax consequences of investing in MLPs based on their specific circumstances and should consult with their tax advisor regarding the tax consequences of an investment strategy of investing in MLPs. Investors in MLPs should be aware that any changes in the current tax law could potentially result in future and retroactive tax consequences and should consult their tax advisors regarding any tax law changes. Investors in MLPs may be

required to file tax returns and pay tax in each state in which the MLP operates. Individual retirement accounts and retirement plans investing in MLPs may be required to report unrelated business taxable income (UBTI) and pay unrelated business income tax (UBIT). Tax reporting information for MLPs is provided to investors on an annual Schedule K-1 issued by an MLP. Investors may be required to request an extension of time to file their tax returns if an MLP has not issued a Schedule K-1 by April 15.
