

The **DAC North American Midstream Energy (“NAME”) Strategy** invests in high quality, publicly traded midstream energy Master Limited Partnerships (“MLPs”) and C Corporations that derive a majority of their earnings and cash flow from gathering, transporting and/or storing hydrocarbons and other energy

commodities. It is designed for investors seeking higher income than more traditional investments as well as portfolio diversification and the potential for long term, capital appreciation and income growth.

STRATEGY OVERVIEW

Objective: The strategy seeks to provide high, current and sustainable income as well as the potential for long term capital appreciation and income growth through investments uniquely positioned to benefit from the U.S. energy revolution.

Designed For: Investors seeking higher income than more traditional investments as well as providing portfolio diversification and the potential for long term, capital appreciation and income growth.

Strategy Inception: 4/30/2006

Composite Inception: 12/31/2011

Primary Benchmark: Alerian MLP Index

Investment Category: Mid Cap Value

Investment Structures: SMA/UMA

Securities: ≥ 90% Equity, 15-25 holdings

PORTFOLIO DIVERSIFICATION

- 86% Oil & Gas Storage & Transportation
- 8% Oil & Gas Refining & Marketing
- 4% Oil & Gas Equipment Services
- 2% Other

OPPORTUNITIES IN MIDSTREAM ENERGY INVESTMENTS

- We believe an overweight allocation to midstream energy investments may lower overall portfolio volatility and increase income, through the diversification impact of non-correlated assets, without negatively impacting long term returns.

	Energy Market	REITS	Utilities	Commodities	Bonds	U.S. Equity
Correlation to MLPs	0.85	0.51	0.27	0.53	0.09	0.65

Indices used: “MLPs”: Alerian MLP; “REITS”: FTSE Nareit US Real Estate; “Utilities”: S&P Utilities Select Sector; “Energy Market”: S&P 1500 Energy Sector; “Commodities”: S&P GSCI TR CME; “Bonds”: Bloomberg Barclays Aggregate Bond; “U.S. Equity”

- Midstream energy companies and master limited partnerships offer investment opportunities in the energy sector with consistently higher income than more traditional sources but without the exposure to exploration or commodity risks.

Source: Bloomberg, Alerian, Dividend Assets Capital. As of December 31, 2024. Representation of the 10-year average Consumer Price Index relative to the 10-year average yield and the current (12/31/24) yield for various indices. - Fees charged by midstream energy companies are often long-term, contractual obligations, regulated by Federal agencies and **indexed to inflation**.
- Midstream energy companies and MLPs operate high quality, irreplaceable assets that transport and/or store energy commodities generating **stable cash flows**.
- Direct, “Limited Partner” ownership is the only way to get the full tax advantages of MLPs. Pooled funds cannot provide the same “pass through” benefits, effectively muting yield, return or both.

Clarity. Simplicity. Devotion.

The Portfolio Composition, Top Five Holdings, Portfolio Characteristics information as well as the graphs representing Growth of \$500,000 and Annual Portfolio Income and Growth are based on information pertaining to a representative account in the strategy's GIPS composite. Individual holdings, statistics and characteristics may differ from those of the composite and representative account due to the size of the portfolio, client-specific constraints, tax considerations or other factors. A complete list of holdings is available upon request.

Past performance is not indicative of future results. Returns are presented gross and net of management fees and include the reinvestment of all income. "Pure Gross of Fees" returns are shown as gross of all fees and transaction costs. The inclusion of transaction, custodial and/or advisory fees as well as other expenses such as "bundled" fees charged by a platform sponsor, will reduce actual returns. After 1/1/2024, "Net of Fees" returns are presented net of actual investment management fees, net of trading expenses, net of actual "bundled" fees, net of withholding taxes, and gross of custodial fees for "non-bundled" portfolios. "Net of Wrap Fees" returns are calculated by subtracting 1/12th of 3.00% from the monthly pure gross return. 3.00% represents the maximum "bundled" wrap fee that a sponsor may charge clients seeking investment management services in the designated strategy. Other than brokerage commissions this fee includes investment management, portfolio monitoring, consulting services, and in some cases, custodial services. Actual fees may vary by wrap program. DAC receives a portion of the total wrap fee paid to the wrap program sponsor for its portfolio management services. Prior to 1/1/2024, Net returns were calculated using just the "Net of Wrap Fees" methodology.

Data is deemed to be reliable, but DAC does not guarantee reliability or accuracy. You should carefully consider the investment objectives, potential risks, management fees, and charges and expenses before investing.

Master Limited Partnerships (MLPs) are limited partnerships that trade as units on public securities exchanges. MLPs are generally held in an investor's account to generate income. A substantial portion of the cash distributions made are considered a return of capital, tax-deferred until the units are sold. Investors in MLPs may be required to file tax returns and pay tax in each state in which the MLP operates. Individual retirement accounts and retirement plans investing in MLPs may be required to report unrelated business taxable income (UBTI) and pay unrelated business income tax (UBIT). Investors should consult a tax advisor regarding their individual tax circumstances.

The Alerian MLP Index (NYSE: AMZ) is a widely recognized, index that includes a composite of the 15 - 20 most prominent energy MLPs. The Alerian Midstream Energy Index (NYSE: AMNAX) is a broad-based composite of North American energy infrastructure companies whose constituents include MLPs and C-Corporations that earn the majority of their cash flow from midstream activities involving energy commodities. These indexes are unmanaged, and you cannot invest directly in an index. The index returns do not reflect the deduction of fees.

Dividend Assets Capital, LLC claims compliance with the Global Investment Performance Standards (GIPS®). The GIPS compliant presentation, as well as a full list of the Firm's composite descriptions, is available upon request by contacting DAC at (866) 348-4769.
